Proxima Software releases FontExpert 2016 Version 14.0 Font Manager for Windows

FontExpert 2016 version 14.0 is new release incorporating many improvements, new features, and fixes.

October 9, 2016 - Proxima Software today has announced the release of FontExpert 2016 version 14.0 font manager for Windows.

This release incorporates many new enhancements including:

- Fonts view which replaces former Groups view and Library view.
- Edit Font Properties - renaming font family name and other font properties (modifies .TTF/.OTF).
- Convert to WOFF.
- Preview WOFF files.
- Search in Library became a modeless window.
- Other enhancements and fixes.

The complete list and description of new features can be found in the release notes for the product, found on the company's website, www.proximasoftware.com/fontexpert.

About Proxima Software
